MEMORANDUM FOR: D/DCI/IC

FROM: Director of Central Intelligence

SUBJECT: DCI Role and Procedures in a Crisis Situation

25X1 1. I have been thinking about the various functions of the
25X1 DCI, and find that I need some more education on my role during
a crisis situation. [REDACTED]

25X1 2. [REDACTED]
could you set up a crisis "walk through" exercise, establishing
in at least skeletal form the task groups and communications nets
within the Intelligence Community that our current planning calls
for? I'd like to observe how the system works.

GENERAL CONCEPTS ABOUT THE INTELLIGENCE COMMUNITY

1. ☐ is too deeply into the study and analysis business.
 - a. Check particularly in the area of nuclear proliferation.
 - b. Check on what distribution they give to their product.
2. Perhaps there should be a concept that different levels of producers have different levels of dissemination or consumers, e.g., Naval Intelligence can go to the CNO but no further.
3. Write down what we are trying to accomplish with our Intelligence Community.
4. The lack of any policy position in the CIA or DDI or NIO structures is a critical point to make.
5. Tenure and lack of turnover or lateral entry in the DDI is an important problem.
6. Severing DDI from DDO would eliminate the perceived bias of the CIA analysis for covert action.
